PROFILE

Application Support Analyst with hands-on experience supporting the medEbridge CRM, managing incidents and service requests in Jira, troubleshooting issues, configuring user access and workflows, and validating changes through UAT. Brings additional experience with CRM integrations, REST APIs, webhooks, user onboarding, and technical documentation.

EXPERIENCE

COGENT THINKING | APPLICATION SUPPORT ANALYST
January 2026 - Current | Melbourne

- Provided **application support** for the medEbridge CRM platform, troubleshooting issues, resolving bugs, performing root cause analysis, and managing incidents and service requests via Jira.
- Configured and maintained platform features in medEbridge based on business requirements, including **user management** (account creation, access control), **client onboarding** and ongoing system enhancements.
- Designed and implemented **custom workflows** on the Vinci platform and developed **digital forms using Form.io** to streamline business processes and data collection.
- Performed **User Acceptance Testing (UAT)** for new features and enhancements, validating functionality and supporting successful deployments.
- Created and maintained **technical SOPs and training materials** using **Confluence** and **Scribe**, leveraged **BatchGeo** for geospatial insights, and utilized **SharePoint** for document management and team collaboration.

MESON AGENCY | API DEVELOPER
August 2025 - December 2025 | Melbourne

- Engineered and automated data integrations between client CRMs and internal systems using **HubSpot APIs** and **webhooks**, streamlining customer data synchronization.
- Integrated with the **Connex** platform to manage outbound calling workflows and auto-log responses back into HubSpot, improving client feedback capture efficiency.
- Designed and deployed a complete backend using **Xano (no-code AI backend platform)** and developed the **frontend in WeWeb**, integrating APIs for a seamless customer engagement platform.
- Enhanced marketing and sales workflows through automated pipelines that reduced manual data handling by an estimated 60%.
- Created **Lucidchart** diagrams for database design, API flow mapping, and backend process documentation.

DEAKIN UNIVERSITY | REPORTING ANALYST
August 2023 – August 2025 | Burwood

- Led **data-driven reporting** on student engagement by analysing inquiries, attendance, and survey data to identify recruitment trends and inform strategic planning.
- Developed **interactive dashboards** and actionable summary reports that optimized event scheduling and improved prospective student conversion rates.
- Delivered high-impact presentations to large student groups, showcasing strong stakeholder engagement and communication skills.
- Partnered with admissions to translate analytical findings into tailored campus experiences for diverse student demographics.

EDUCATION

DEAKIN UNIVERSITY | MASTER OF DATA SCIENCE
2023-2025 | Cum. GPA: 3.9/4 | Melbourne, Australia

PUNE UNIVERSITY | BE COMPUTER SCIENCE
2019-2023 | Cum. GPA: 8.6 / 10.0 | Pune, India

PROJECTS

AQI DATA WAREHOUSE & VISUALIZATION | END-TO-END DATA ENGINEERING ON SNOWFLAKE

- Engineered an end-to-end data warehousing pipeline on Snowflake Cloud for India's AQI data from the CPCB Open Data API.
- Designed a multi-layered Stage–Clean–Consumption–Publish architecture using Dynamic Tables, Snowpark Python UDFs, and Tasks for automated ETL.
- Modeled a star schema enabling time-series and spatial analysis, reducing query time by 45%.
- Deployed interactive Streamlit dashboards hosted in Snowflake to visualize pollutant trends (PM2.5–O3) with real-time geo insights.

BRITISH AIRWAYS REVIEWS DASHBOARD | DATA VISUALIZATION IN TABLEAU

- Created an interactive **Tableau dashboard** analyzing 6,000+ customer reviews to assess service KPIs across routes and aircraft types.
- Implemented dynamic filters and geographic heatmaps for deep-dive analysis, revealing top-performing flight categories.
- Improved data storytelling and stakeholder decision-making through visually engaging dashboards and trend analysis.

PROJECT ECHO | API DEVELOPMENT & TEAM LEAD
- Built a secure **2FA authentication system** using **FastAPI**, **Twilio**, and **MongoDB**, with UUID-based OTP verification and 5-minute expiry.
- Integrated 2FA into the frontend, enhancing user security and UX with multi-factor authentication.
- Resolved critical **Docker** compatibility issues to ensure stable containerized deployments across environments.
- Led API team collaboration via **GitHub**, **Planner**, and **Teams**, producing onboarding videos and updated documentation.

NEWS-O-MANIA | ML-DRIVEN NEWS RECOMMENDATION SYSTEM
- Developed a personalized **news recommendation system** using Flask, React, and **MongoDB** with **NLP-based content filtering**.
- Automated real-time news retrieval and ranking, increasing user engagement by 30%.
- Applied skills in Python, API design, and database management to deliver an end-to-end ML solution.

COVID-19 DATA ANALYSIS USING PYTHON | DATA ANALYTICS & VISUALIZATION PROJECT
- Cleaned and transformed large-scale COVID-19 datasets using **Pandas** and **NumPy**, performing aggregation, feature engineering, and anomaly detection for analytical accuracy.
- Combined global COVID-19 metrics with the World Happiness Report via **SQL joins** to uncover correlations between health outcomes and socio-economic indicators.
- Created insightful **Seaborn**, **Matplotlib**, and **Tableau visualizations** highlighting regional trends and policy impacts across countries.
- Applied **regression** and **predictive modeling** to forecast infection trajectories, improving data-driven decision insights by 35%.

ACHIEVEMENTS

- 'News-O-Mania' **News Recommendation System** Using Sparse Matrix Implementation, 'has obtained **copyright approval certificate** from the 'Copyright Office - Government of India'.

SKILLS

TECHNOLOGIES
• Nodejs • Express • Flask • NoSQL • SQL • MongoDB • MySQL • PostgreSQL • Flutter • AWS • Microsoft Azure • Tensorflow • Keras • Selenium • PowerBI • Tableau • Docker • Bootstrap • Git • BigQuery • Snowflake • Salesforce
LANGUAGES
Python • Javascript • C++ • C • C# • Java • R • Excel

EXTRACURRICULARS

- Deloitte Australia Data Analytics Job Simulation - Forage
- Commonwealth Bank Introduction to Data Science Job Simulation - Forage

CERTIFICATIONS

- SnowPro Associate: Platform Certification, Snowflake
- Snowflake – The Complete Masterclass, Udemy
- Google Data Analytics Professional, Coursera
- Microsoft Certified: Azure Fundamentals, Microsoft Learn (AZ-900)
- Docker Foundations Professional Certificate, Docker
